

Wendy

The Wendy stove is our tiniest model, with a maximum nominal output of 2 KW.

This woodburner was developed in response to demand for a smaller alternative to our popular Louis model, and has been produced since 2005.

This stove is currently heating hundreds of Bell Tents, small Vans and Caravans, Horse Drawn Wagons, Boats, Yurts up to 12', Tentipis, Sheds, and other spaces where a larger, or less efficient, stove would be unsuitable.

£260 inc Vat

Power Output:	2 KW Max.
Overall dimensions (mm):	355h x 220w x 380d
Firebox dimensions (mm):	240x170x240
Flue outlet:	100mm (4") diameter, in centre
